Mr. Solomon Casspi – Letter of recommendation

Dear Sir/Madam,

I am pleased to write this letter supporting Solomon's Data Science Doctoral Fellowship application. Solomon completed his M.Sc. at Tel-Aviv University under my supervision (joint supervision with Prof. Hagit Messer-Yaron). In his thesis research, a practical and efficient algorithm for the blind calibration of antenna arrays in automotive radar was derived. Solomon combines principled mathematical concepts from estimation theory with hardware-aware and application-oriented algorithmic derivations in his studies. His research shows high analytical skills, which are essential for successful theoretical studies, and dedication, hard work, and independence. Solomon's master results have been submitted to the IEEE Transactions on Aerospace and Electronic Systems, which is under review. As demonstrated in Solomon's research, integrating theoretical knowledge with concrete applicative and hardware considerations is a key and non-trivial skill, which is extremely advantageous in the future research work areas he intends to pursue in his Ph.D. studies. Solomon possesses all the abilities of an outstanding graduate student: he is sharp-minded, extremely hard-working, and dedicated, and he does not leave a stone unturned in his research work. Since Solomon intends to give his full attention to his Ph.D. studies, I thus believe that being granted the Data Science Doctoral Fellowship application will be a major leap for Solomon. I strongly recommend granting him the Fellowship.

Sincerely,

Prof. Joseph Tabrikian
