Subject: Mr. Solomon Casspi – Letter of recommendation

I am writing this letter of recommendation to support Mr. Solomon Goldgraber Casspi's application for Ph.D. studies. Solomon completed his M.Sc. studies at Tel-Aviv University in December 2022 under my supervision (joint supervision with Prof. Hagit Messer-Yaron. In his thesis research, we have developed an algorithm for the blind calibration of antenna arrays in automotive radar applications. Solomon combines principled mathematical concepts from estimation theory with hardware-aware and application-oriented algorithmic derivations in his studies. His research shows high analytical skills, essential for successful theoretical studies, as well as dedication, hard work, and independence. Solomon's master results were published in IEEE Transactions on Aerospace and Electronic Systems. Integrating theoretical knowledge with concrete applicative and hardware considerations, as demonstrated in Solomon's research, is uncommon skill, which is extremely advantageous in research areas that he intends to pursue in his Ph.D. studies. I believe that Solomon possesses all the abilities required for a successful Ph.D. research: he is sharp-minded, extremely hard-working, and dedicated. Therefore, I warmly recommend accepting his application for Ph.D. studies.

Sincerely,

Prof. Joseph Tabrikian
